Aspiring Supply Chain Analytics professional with progressive experience in high-volume distribution, cold chain compliance, and building analytical tools to improve operational efficiency. Proven ability to optimize end-to-end logistics operations, demand forecasting, inventory optimization, and drive data-informed decision-making through advanced analytics and ERP systems. Advanced working knowledge of Python, SQL, Power BI and Excel. Eligible to work fulltime in Canada and open to travel across USA.

EXPERIENCE

Logistics and Operations Coordinator

Surrey, BC

Cloverdale Cold Storage

Aug 2025 – Ongoing

- Manage and verify 25+ inbound FTL/LTL shipments daily against BOL, PO, and packing lists; inspect container temperature, seal integrity, and product condition to maintain full cold chain compliance.
- Coordinate 20+ outbound shipments daily; prepare and control BOLs, packing lists, picking slips, delivery notes, and commercial invoices; verify product against sales orders and communicate shipment status to customers.
- Conduct ongoing demand analysis using Excel and Power BI to forecast inventory needs, optimize rack allocation, and prevent stockouts across cold storage; support warehouse manager with data-informed replenishment decisions.
- Train new employees on WMS, RF/QR scanners, HACCP compliance, MHE operation, and standard operating procedures.

Software Engineer

Surrey, BC

Key Innovations Inc.

Jan 2025 – Aug 2025

- Automated order management by building REST API integrations that synced WooCommerce and Smartstore e-commerce orders directly into Syncore ERP, eliminating 40 hours/week of manual data (~\$52K annual savings).
- Developed a calendar-based order tracking application on top of Syncore ERP's API to monitor open orders and deadlines, saving ~\$900/week in operational overhead and reducing missed follow-ups.
- Built a SaaS-style quoting system replacing Excel-based pricing workflows, reducing quote turnaround time by 60–80%.
- Designed and maintained Power BI dashboards and SQL queries reporting on sales trends, demand patterns, and delivery performance KPIs, enabling data-driven decisions for senior management.

Hub Supervisor

Richmond, BC

Ups Canada

Oct 2023 – Jan 2025

- Promoted from loader/unloader to Hub Supervisor; oversaw 25,000+ daily package volume across inbound and outbound operations, managed 15+ trailers and dock doors per shift.
- Supervised 10+ employees per shift; assigned tasks, monitored workloads, and balanced staffing based on volume fluctuations.
- Maintained shipment records, load sheets, and operational logs using UPS WorldShip and Symphony WMS; monitored scanning accuracy and resolved package exceptions in coordination with dispatch and drivers.
- Trained and onboarded 30+ employees on sortation processes, RF scanners, data entry protocols and WHMIS safety procedures.

PROJECTS (Ongoing.)

[Supply Chain Analytics Portfolio](#) (EDA, S&OP Analysis, Inventory Optimization, Demand Forecasting, Replenishment Planning)

SKILLS

Python (pandas, NumPy, Matplotlib), SQL, Power BI, Excel (PivotTables, XLOOKUP, Forecasting Functions), KPI Reporting, Data Visualization, Ad Hoc Analysis, Demand Forecasting, Inventory Optimization, Inbound & Outbound Logistics, WMS/TMS, Shipping Documentation, FTL/LTL, ERP Systems (Syncore, SAP), REST API Integration, Flask, FastAPI, Docker, Microsoft Azure, Google Cloud, LangChain, LangGraph, OpenAI APIs, Git, JIRA

EDUCATION

Post-Baccalaureate Diploma Technical Management and Services

May 2024 – Aug 2025

Kwantlen Polytechnic University
